Empowering patients with standardised outcomes data and insights to drive healthcare improvements -

The H2O Health Outcomes Observatory Project

This project has received funding from the Innovative Medicines Initiative 2 Joint Undertaking under grant agreement N° 945345-2.

This Joint Undertaking receives support from the European Union's Horizon 2020 research and innovation programme and EFPIA and Trial Nation and JDRF.

What is the gap?

- **Standardize** in a multi-stakeholder framework, including **outcomes that matter to patients**
- **Implement** in clinical practice
- Establish **confidentiality/trust** and convince populations that their data is safeguarded; communicate the **benefits of data collection + data sharing**

H₂O

What do we want to contribute to health care through H2O?

A Patients

Improve dialogue between patient and clinician to receive better care

Obtain data to inform and enhance clinical decision

B Healthcare Providers

Patient-Reported Outcomes

Integrated health data to advance science

Researchers & Scientist

C

Improve the quality and sustainability of healthcare for the health authority

Health Authority

D

H₂O | The key objectives

- Create multi-stakeholder **consensus** on PROs and core outcome sets that can be measured in clinical practice across several countries;
- Equip patients with **practical tools** to measure their outcomes in a standardized manner and improve clinical care both at a patient and population level;
- Create an ethical framework around data **governance** to establish trust and enable data analysis to advance health science and policy.

Building a Value-Based Care Infrastructure in Europe: The Health Outcomes Observatory

By Tanja Stamm, PhD, Dr. rer. biol. hum., Mag. phil., MSc, MBA and Others

Leaders at the European Union's Innovative Medicines Initiative are developing a large-scale multi-stakeholder international ecosystem to incorporate patient-reported outcomes and measures to improve patient engagement and drive value.
